### **PITTSBURGH CORNING ACCESSORIES** FOR FOAMGLAS® INSULATION SYSTEMS

# FOAMGLAS

Pittsburgh Corning has been the leader in cellular glass insulation system technology for more than 75 years. Our FOAMGLAS<sup>®</sup> Insulation and accessory products provide a comprehensive system solution for most industrial and commercial insulation needs.

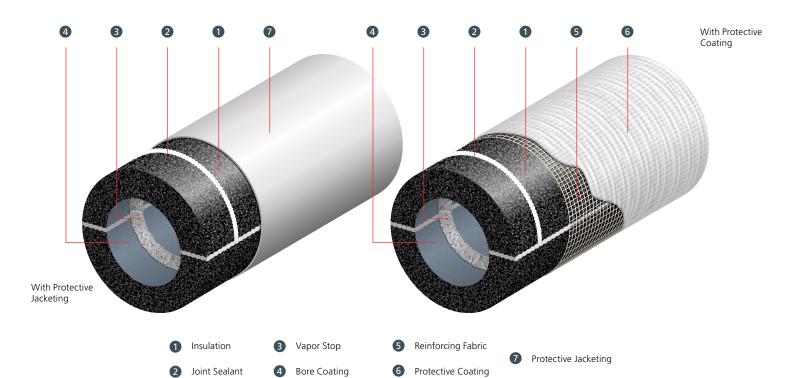

The importance of compatible accessory products such as adhesives, coatings, sealants, fabrics and jacketing should not be overlooked. Pittsburgh Corning's accessories are formulated, designed and tested to ensure optimum performance of your FOAMGLAS® insulation system. Without such consideration, the dependability and performance of your system could be at risk. Therefore, we recommend the system approach when specifying insulation and accessory products. This is the most effective way to ensure your insulation system performs now and in the future.

For additional information on FOAMGLAS<sup>®</sup> insulation, accessories or systems, please contact Pittsburgh Corning at any of our worldwide offices or visit us at www.foamglas.com.

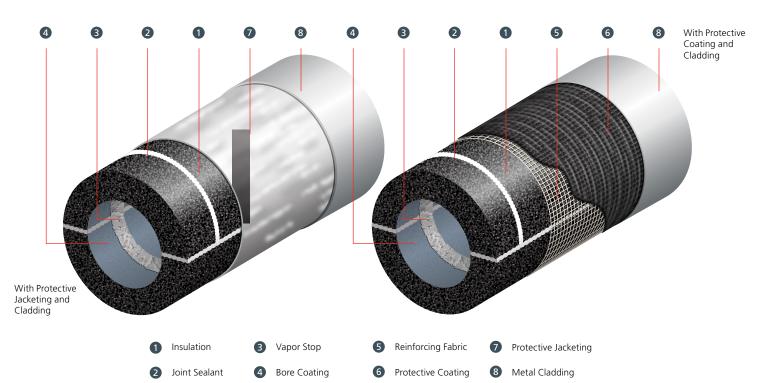

Vapor Stop Detail

Item		Product Name	Product Description	Service Temperature <sup>1</sup>	Supplemental Information
1 Ins	sulation	FOAMGLAS® Insulation	A lightweight, rigid, cellular glass insulation	-268°C to 482°C (-450°F to 900°F)	
	pint Sealant ptions	PITTSEAL <sup>®</sup> 444Ns Sealant	Butyl sealant	-150°C to 82°C (-238°F to 180°F)	For joints, protrusions and laps
		PITTSEAL <sup>®</sup> 444N Sealant	Butyl sealant	-56.6°C to 82°C (-70°F to 180°F)	For joints, protrusions and laps
3 Va	apor Stop	PITTSTOP™ 196 Vapor Stop	Two component cryogenic sealant	-196°C to 121°C (-320°F to 250°F)	
4 Cr Ac	ryogenic dhesive	PC <sup>®</sup> 42 Cryogenic adhesive	100% Solids Three-component adhesive	-196°C to 121°C (-320°F to 250°F)	
	ore Coating ptions	Hydrocal <sup>®</sup> B-11 Adhesive	A reactive gypsum product	-268°C to 482°C (-450°F to 900°F)	For use on LOX or LIN systems
		PC <sup>®</sup> 80M Mortar	A two-component inorganic mortar for bore coating	-196°C to 320°C (-320°F to 608°F)	Meets MIL-I-24244 ASTM C795, NRC 1.36
		НТАА	A modified calcium sulphate product with inert mineral fillers	-268°C to 482°C (-450°F to 900°F)	For use on LOX or LIN systems
		PITTCOTE <sup>®</sup> 16 LTAA	A water-based product	-182°C to 120°C (-296°F to 248°F)	Not for use on LOX or LIN systems
	einforcing Fabric ptions	PC® Fabric 79	Open mesh synthetic fabric	No limit listed	
		PC <sup>®</sup> 150 Mesh	Open mesh glass fabric	No limit listed	
	rotective Coating ptions	PITTCOTE® 300 Finish	Vapor barrier mastic/coating	-40°C to 93°C (-40°F to 200°F)	Must be protected from UV exposure with metal or other jacketing
	rotective acketing	PITTWRAP <sup>®</sup> B100 Jacketing	Self-sealing aluminum butyl laminate for above ground systems	-50°C to 140°C (-58°F to 284°F)	
		PITTWRAP <sup>®</sup> IW50 Jacketing	Self-sealing modified bituminous membrane for above ground systems	-50°C to 75°C (-4°F to 167°F)	Ideal for asphalt roller coated applications
Ot	ther	Strapping Tape Metal Bands Metal Cladding			

For use with Reinforcing Fabric and Protective Coating or Protective Jacketing

Item	Product Name	Product Description	Service Temperature <sup>1</sup>	Supplemental Information
1 Insulation	FOAMGLAS® Insulation	A lightweight, rigid, cellular glass insulation	-268°C to 482°C (-450°F to 900°F)	
2 Joint Sealant Options	PITTSEAL <sup>®</sup> 444Ns Sealant	Butyl sealant	-150°C to 82°C (-238°F to 180°F)	For joints, protrusions and laps
	PITTSEAL® 444N Sealant	Butyl sealant	-56.6°C to 82°C (-70°F to 180°F)	For joints, protrusions and laps
	PITTSEAL <sup>®</sup> CW Sealant	MS polymer	-59°C to 104°C (-75°F to 220°F)	VOC compliant For joints, protrusions and laps
	PC <sup>®</sup> 18 Bituminous Adhesive	One component bitumen cold glue	-30°C to 80°C (-22°F to 176°F)	
3 Vapor Stop Options	PITTSEAL <sup>®</sup> 444Ns Sealant	Butyl sealant	-150°C to 82°C (-238°F to 180°F)	For joints, protrusions and laps
	PITTSEAL <sup>®</sup> 444N Sealant	Butyl sealant	-56.6°C to 82°C (-70°F to 180°F)	For joints, protrusions and laps
	PITTSEAL <sup>®</sup> CW Sealant	MS polymer	-59°C to 104°C (-75°F to 220°F)	VOC compliant
4 Bore Coating	PITTCOTE® 16 LTAA	A water-based product	-182°C to 120°C (-296°F to 248°F)	
5 Reinforcing Fabric	PC® Fabric 79	Open mesh synthetic fabric	No limit listed	
6 Protective Coating Options	PITTCOTE <sup>®</sup> 404 Coating	Weather barrier mastic/coating	-34°C to 82°C (-30°F to 180°F)	
7 Protective Jacketing	PITTWRAP <sup>®</sup> CF Jacketing	Cellulose free fiberglass reinforced vapor retarding jacket	-40°C to 104°C (-40°F to 220°F)	Often supplied pre-jacketed for ease of installation
Other	Metal Cladding Foil Wrap Filament Tape Metal Bands			

Iten	า	Product Name	Product Description	Service Temperature <sup>1</sup>	Supplemental Information
1	Insulation	FOAMGLAS <sup>®</sup> Insulation	A lightweight, rigid, cellular glass insulation	-268°C to 482°C (-450°F to 900°F)	
2	Joint Sealant Options	PITTSEAL <sup>®</sup> 444Ns Sealant	Butyl sealant	-150°C to 82°C (-238°F to 180°F)	For joints, protrusions and laps
		PITTSEAL® 444N Sealant	Butyl sealant	-56.6°C to 82°C (-70°F to 180°F)	For joints, protrusions and laps
		PITTSEAL <sup>®</sup> CW Sealant	MS polymer	-59°C to 104°C (-75°F to 220°F)	VOC compliant For joints, protrusions and laps
3	Vapor Stop	PITTSEAL <sup>®</sup> 444Ns Sealant	Butyl sealant	-150°C to 82°C (-238°F to 180°F)	
		PITTSEAL <sup>®</sup> 444N Sealant	Butyl sealant	-56.6°C to 82°C (-70°F to 180°F)	
		PITTSEAL <sup>®</sup> CW Sealant	MS polymer	-59°C to 104°C (-75°F to 220°F)

5	Reinforcing Fabric	PC® Fabric 79	Open mesh synthetic fabric	No limit listed	
6	Protective Coating Options	PITTCOTE® 300E Coating	Vapor barrier mastic/coating	-40°C to 93°C (-40°F to 200°F)	Must be protected from UV exposure with metal or other jacketing.
7	Protective Jacketing Options	PITTWRAP <sup>®</sup> B100	Self-sealing aluminum butyl laminate for above-ground systems	-50°C to 140°C (-58°F to 284°F)	
		PITTWRAP <sup>®</sup> IW50	Self-sealing modified bituminous membrane for above ground systems	-20°C to 75°C (-4°F to 167°F)	Ideal for asphalt roller coated applications
		PITTWRAP <sup>®</sup> IW30	Self-sealing modified bituminous membrane for above ground systems	-32°C to 38°C (-25°F to 100°F)	
	Other	Metal Cladding Filament Tape Metal Bands			

#### For use with Reinforcing Fabric and Protective Coating or Protective Jacketing

#### ABOVE AMBIENT/HIGH TEMPERATURE PIPE SYSTEMS

Above Ambient

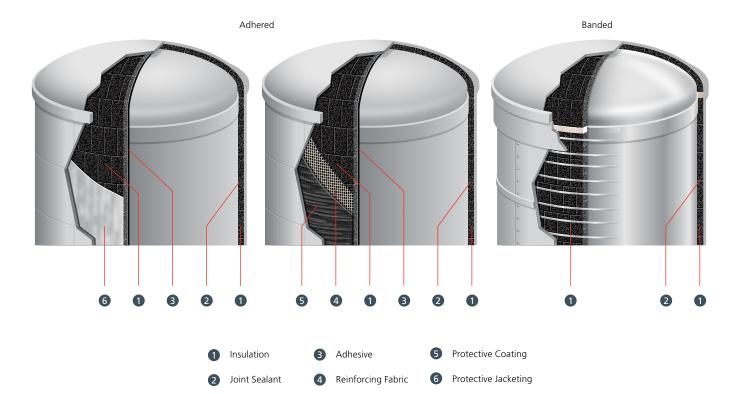

For use with Reinforcing Fabric and Protective Coating or Protective Jacketing

High Temperature

Item	1	Product Name	Product Description	Service Temperature <sup>1</sup>	Supplemental Information
1	Insulation Options	FOAMGLAS <sup>®</sup> Insulation	A lightweight, rigid, cellular glass insulation	-268°C to 482°C (-450°F to 900°F)	
		FOAMGLAS <sup>®</sup> Stratafab™ Insulation		-268°C to 482°C (-450°F to 900°F)	Not for indoor use
2	Sealant Options	PITTSEAL <sup>®</sup> 444Ns Sealant	Butyl sealant	-150°C to 82°C (-238°F to 180°F)	For joints, protrusions and laps
		PITTSEAL <sup>®</sup> 444N Sealant	Butyl sealant	-56.6°C to 82°C (-70°F to 180°F)	For joints, protrusions and laps
		PC <sup>®</sup> RTV 450 Sealant	High Temperature Silicone Sealant	-100°C to 204°C (-248°F to 400°F)	For joints, protrusions and laps
		PC <sup>®</sup> Hi-Temp RTV Sealant	High Temperature Silicone Sealant	-150°C to 260°C (-238°F to 500°F)	For joints, protrusions and laps
3	Bore Coating	Hydrocal B-11 Adhesive	A reactive gypsum product	-268°C to 482°C (-450°F to 900°F)	
		PC <sup>®</sup> 80M, Mortar	Two component, inorganic noncombustible bore coating	-196C to 320C (-320F to 608F)	Stainless Steel Compatible
		НТАА	A modified calcium sulphate product with inert mineral fillers	-268°C to 482°C (-450°F to 900°F)	For use on LOX or LN2 systems
4	Protective Coating Options	PC® 700K System	PC <sup>®</sup> 80M Mortar and PC <sup>®</sup> 150 Mesh		
5	Protective Jacketing	PITTWRAP <sup>®</sup> CF Jacketing	Cellulose free fiberglass reinforced vapor retarding jacket	-40C to 104°C (-40°F to 220°F)	Often supplied pre-jacketed for ease of installation
	Other	Metal Cladding Filament Tape Stainless Steel Bands			

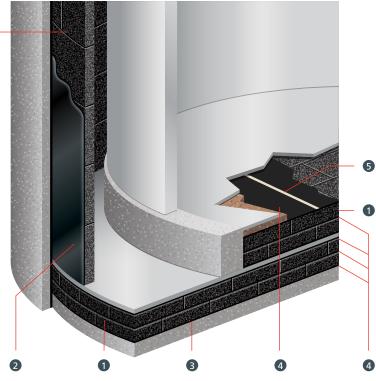

#### For use with Reinforcing Fabric and Protective Coating or Protective Jacketing

	Other	Metal Jacket Metal Cladding Metal Bands Mineral Wool			

#### **CRYOGENIC TANK BASE SYSTEMS**

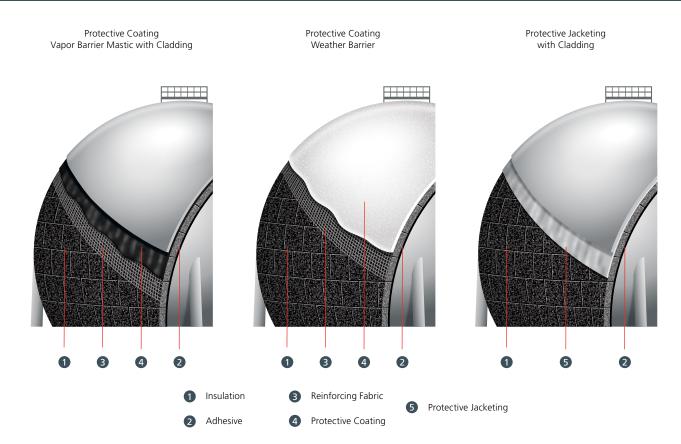

Item	Product Name	Product Description	Service Temperature <sup>1</sup>	Supplemental Information
1 Insulation	FOAMGLAS® Block Insulation	A high compressive strength and low thermal conductivity cellular glass block specially made for tank base construction and other industrial load bearing applications	Without Load -268°C to 482°C (-450°F to 900°F) With Load -268°C to 400°C (-450°F to 752°F)	Use FOAMGLAS® ONE <sup>™</sup> Insulation for sidewalls and FOAMGLAS® HLB Insulation for tank base
2 Adhesive	PC® 88	Urethane modified asphalt adhesive	-150°C to 82°C (-230°F to 180°F)	
	PC® 99 2K	Two part moisture curing, polyether adhesive	-125°C to 60C (-193°F to 140°F)	
3 Tank Base Primer	PITTCOTE® TB Primer	A low VOC cutback asphalt primer used to prime porous and prepared surfaces	-178°C to 82°C (-289°F to 180°F)	
4 Interleaving Layer	PITTCOURSE <sup>™</sup> 100 High Performance Damp Proof Course	A modified bitumen, nonmetallic sheet for use between layers of FOAMGLAS <sup>®</sup> Insulation tank base systems	-180°C to 65°C (-292°F to 149°F)	For use between layers of FOAMGLAS <sup>®</sup> Insulation
5 Jointing Tape	PITTCOURSE <sup>™</sup> DPC Jointing Tape	A modified acrylic double-sided self-adhesive tape, scrim reinforced and solvent free	-180°C to 65°C (-292°F to 149°F)	
Other	Asphalt Saturated Felt Asphalt Base Sheet Ceramic Paper,Sand Resilient Blanket, Perlite			

<sup>1</sup>Service temperature limits are derived from laboratory evaluation of the product. Variations in substrates, loading conditions, or other external factors may further limit service temperature. Always consult Pittsburgh Corning's FOAMGLAS® insulation guide specification for suitability for use recommendations for a specific application. Organic materials are not recommended for service temperature below -183°C (297°F)

#### **SPHERE SYSTEMS**

Item	າ	Product Name	Product Description	Service Temperature <sup>1</sup>	Supplemental Information
1	Insulation	FOAMGLAS <sup>®</sup> Insulation	A lightweight, rigid, cellular glass insulation	-268°C to 482°C (-450°F to 900°F)	
2	Adhesive Options	PC <sup>®</sup> 88 adhesive	Urethane modified asphalt adhesive	-178°C to 82°C (-289°F to 180°F)	
		PC <sup>®</sup> 99 2K adhesive	Two-part adhesive is moisture curing, polyether adhesive sealant	-125°C to 60°C (-193°F to 140°F)	
3	Reinforcing Fabric Options	PC <sup>®</sup> Fabric 79	Open mesh synthetic fabric	No limit listed	
		PC® 150 Mesh	Open mesh glass fabric	No limit listed

5	Protective Jacketing	PITTWRAP <sup>®</sup> B100 Jacketing	Self-sealing aluminum butyl laminate	-50°C to 140°C (-58°F to 284°F)	
6	Other	Metal Bands Metal Cladding Elastomeric Sealant			

## DISCOVER OUR FULL LINE OF FOAMGLAS<sup>®</sup> INSULATION SYSTEMS ACCESSORIES

#### **PITTWRAP® JACKETINGS**

PITTWRAP<sup>®</sup> Jacketings protect FOAMGLAS<sup>®</sup> insulation systems from physical and mechanical damage and shields the insulation from the elements.

#### PITTCOURSE™ TANK BASE SYSTEMS

PITTCOURSE™ High performance DPC and the tank base accessory products are used in conjunction with FOAMGLAS® HLB Insulation on cold and cryogenic tank bases.
